Projects

2023/08 – 2023/10	universe— crm project It was the first project in the company, and I upgraded some features. The challenge is how to work with a team.
2023/09 – present	Jarvis In this app you can connect it with all your facebook pages and interact with them from this app I learning what is webhooks, how it work and how integrate it in my project
2023/10 – present	CarVsita This app for booking an appoinment for car maintenance I had two challenges first one send the verification code via whatsapp using GupShup templates it was easy The second one is how to connect with jarvis app to make an order in details from jarvis whatsapp
2023/10 – 2023/10	Everest It's like a landing page but some information was dynamic, and I created the dashboard for it by blade engine in laravel
2023/12 – present	Leedo It's ecommerce for smart card and other features. I updated it for the latest version and connect with jarvis app to confirmation order
